PT 906F2™

THE PRO TRAJECTORY FAIRWAY METAL

The new, Tour-inspired Titleist® PT 906F2 fairway metals raise the bar for long game performance. Born from extensive ground-sole contact research with the world's best players, 906F2 utilizes an innovative Multi-Relief Sole™ design that allows for crisp, solid contact from a variety of turf conditions.

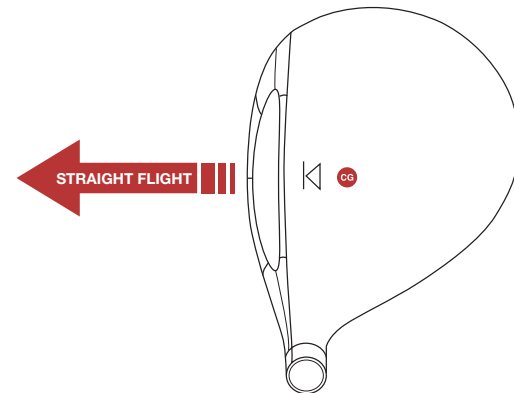

Ernie Els

Multi-Relief Sole minimizes turf resistance and ensures that ground-sole contact remains forward, toward the leading edge of the sole. Maintaining a forward impact point improves directional control and ball flight by reducing the potential for the club to bounce or skip into the ball. The 906F2 performs especially well from closely mown fairways, for players who play the ball forward in their stance or for players who sweep the ball from the turf with a shallow attack angle.

Optimized Sole Weighting repositions the CG farther forward, closer to the face for less draw bias than prior generation fairway metals. Dynamic face closure is reduced for a neutral ball flight that allows the player to dictate the shot shape.

Larger Face Area, particularly low in the heel and toe, increases the effective hitting area for greater forgiveness and playability.

Square Set-Up with a perfectly square face angle delivers the confidence and versatility better players demand. The Multi-Relief Sole allows the clubhead to sit near the front of the sole at address ensuring it doesn't close or hood, even with the toe slightly raised.

Multi-Material Construction with a softer 431 stainless steel body provides a sweet, solid feel while a 275 Carpenter steel face insert creates maximum ball speed over a larger face area.

Bore-Thru Design positions the tip of the shaft lower and closer to the hitting area for better feel and greater stability at impact.

Tour-Inspired Appearance featuring a highly accepted pear-shaped profile, gloss black finish, white full-length scorelines and a raised crown logo offer contemporary looks.

906F2 Specifications

	RH/LH Lofts	Lie	Length
906F2	13°	57°	43"
906F2	15°	57°	43"
906F2	18°	57.5°	42.5"

Stock Shafts: Aldila® NV 75 Fairway, Titleist® 4375 Fairway, UST Proforce® V2 85 Fairway
Stock Grip: Titleist® Tour Velvet Rubber **MSRP:** \$200 (Steel), \$250 (Graphite)
